

Setting up Airfob on an iPhone

STEP 01

Invitation

On your mobile phone, check your email for an invitation from Airfob.

Review the information and tap "Download Mobile Access Card"

STEP 02

Download Airfob

If you do not have the app downloaded, you will be navigated to download it from the App Store.

Once the app is downloaded, open the app

STEP 03

Follow these steps

Tap "Allow" to allow Airfob to send you notifications

"Airfob" Would Like to Send You Notifications

Notifications may include alerts, sounds, and icon badges. These can be configured in Settings.

Don't Allow

Allow

Tap OK

Payment cards and passes in Wallet will not work automatically while "Airfob" is in use.

OK

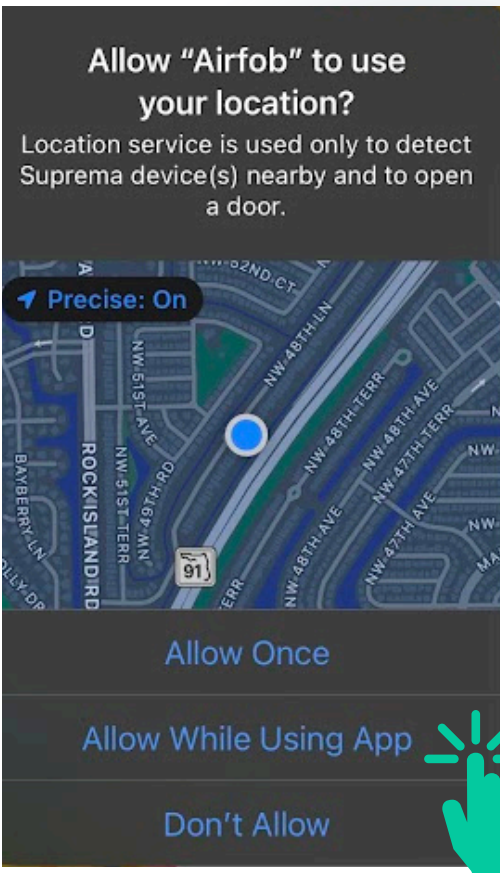

Setting up Airfob on an iPhone

Accept the Terms of Service, Privacy Policy, and Location-Based Services and tap "Agree"

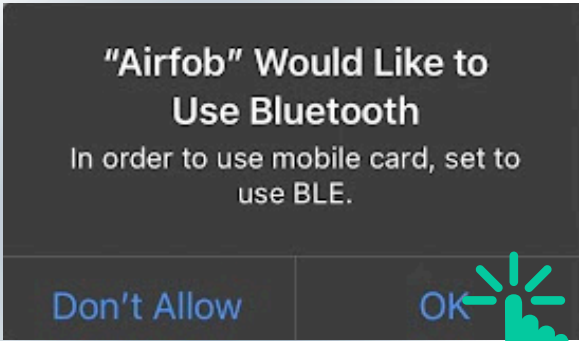

- ☒ Terms of Service [Show](#)
- ☒ Privacy Policy [Show](#)
- ☒ Location-Based Services [Show](#)

Agree

Airfob needs to have access to your location in order to work. Tap "Allow While Using App"

Airfob uses Bluetooth to connect to the readers. Tap "OK"

Setting up Airfob on an iPhone

Under "Bluetooth Connection", select "Always"

Under "Longer Distance Connection" tap "Use"

Bluetooth Connection

Longer Distance Connection

☒ Use

Tap the back arrow to get back to the main screen. You should see your name on the card.

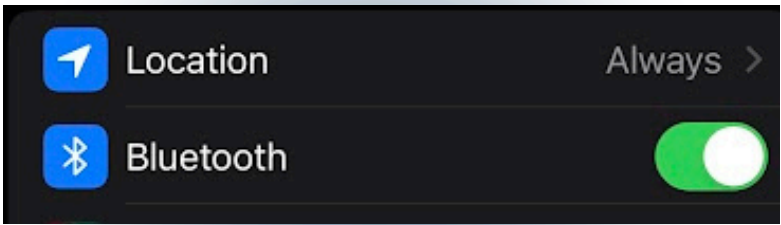

Exit the Airfob app (do not close/kill the app - Airfob needs to run in the background to work properly)

Go to your iPhone settings

Scroll down till you see Airfob

Tap "Airfob" and change your location to "Always" and make sure Bluetooth is enabled.

Exit Settings

Set-up is complete

How to use the system

Bring your phone to the reader and the system will connect to your phone for authentication. You can also open the app and hold on to the card and your phone will send a signal to the reader

If the reader light turns red, you do not have access to that area. If the reader turns green, you have access to that area.

Here is what you need to know about the system.

1. Bluetooth must be enabled while using the app. If Bluetooth is turned off the app will not work.
2. Location Services must be enabled
3. Make sure the location is set to "Always"
4. The app must be running in the background. If the app is closed, you will have to launch it again for it to work.
5. If you delete the Airfob app or mobile pass in the app by accident, a new mobile pass must be issued by the Admin Office.
