

FL SMART HOMES

# SMART SECURITY

Modernize your property with a secure smart security system to protect and retain residents.

## ONE SOLUTION FOR THE WHOLE COMMUNITY

FL Smart Homes can help secure common areas and units. Our multifamily solution helps you modernize access and give residents the amenities they want.

### Mobile Access

Open a door or gate with just a swipe from your mobile device.

### Visitor Entry Systems

See who's trying to get access to the property before letting them in.

### Video Surveillance

Stop crime before it happens at apartment and condo building entrances, parking lots, and lobbies using security cameras.

## VIDEO SURVEILLANCE

### **Protect & Secure**

Security cameras can aid in making your community and families feel more secure. The presence of cameras can reduce criminal activity.

### **Safe Enviroment**

When people see that your community has security cameras, it creates a positive connection. It can help potential buyers/renters identify your community as one that is more desirable.

FL SMART HOMES

Add an extra set of eyes in areas that are most important to you. Let FL Smart Homes design the best security solution for your community.

# Video Intercom

## Open doors and gates from anywhere

You can receive video calls, unlock the door & gates remotely, and provide managed access for delivery people and service providers.

### Video Calling

See who's trying to gain access to the property before letting them in.

### Existing Equipment

We can reuse existing door strikes and magnetic locks, saving on installation cost.

### Remote Management

Remotely manage, update, and monitor property access from anywhere.

# Access Control System

Simplify property-wide access with our contactless & cloud-based access control products.

### Multiple Entry Methods

Unlock doors and gates with a smartphone, fob, key card, PIN code, or fingerprint.

### Audit Trail

Review all door release events at any time with a date and time-stamps

### Manage Permissions

Add and remove users or change permissions from an easy to use dashboard.
